Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, and 4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bar et al (6,511,016).

See especially Figures 3 and 5; and column 5, lines 3-6, 20-43, and 55-65.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bar et al (6,511,016) in view of Rastegar et al (6,727,485).

Bar et al discloses a projectile with flight altering apparatus comprising a plurality of deployable pivoting fins with springs, coupling means connecting adjacent fins (either flexible bridging portion 33 of Figure 3 or spring plates 34 of Figure 5) which will inherently reduce and distribute loads on the fins, and a caging arrangement (holding sleeve 29) which allows the fins to deploy when activated. Bar et al fails to disclose the caging arrangement as being a single wire passing through the main fins. Rastegar et al teach that it is known to provide a single wire passing through fins as the means of deploying the fins to the desired position. See column 7, line 53 – column 8, line 27, especially element 304. Motivation to combine is the mere substitution of known means of deploying fins on a projectile. To employ the teachings of Rastegar et al on the

Art Unit: 3644

projectile of Bar et al and have a single wire caging arrangement is considered to have been obvious to one having ordinary skill in the art.

5. Claims 3 and 3-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Woodrow Eldred whose telephone number is 571-273-6901. The examiner can normally be reached on Monday to Thursday, from 8:00 a.m. to 5:30 p.m..
